

# FYI Flat Panel Monitor Arm

Effortless movement. It's the FYI difference.

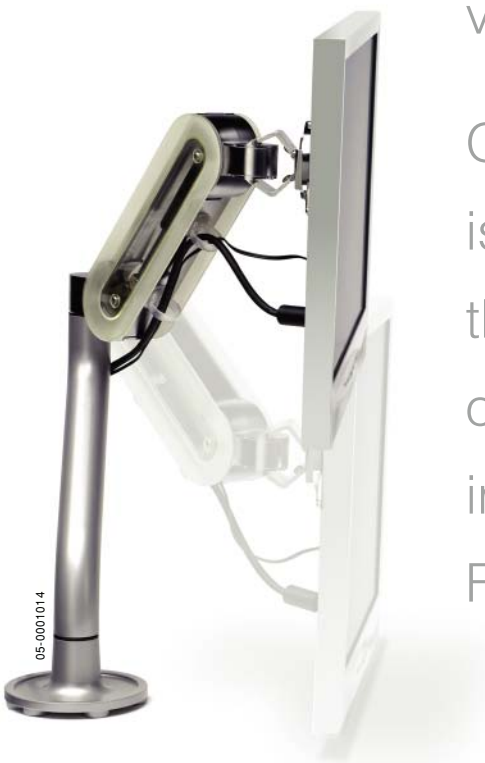

details

# It's your move to healthier viewing.

FYI helps to address a long-established workplace hazard: Eyestrain. The arm easily swivels and tilts the monitor to reduce glare from ambient light. FYI also delivers healthy postures and stress-free movements. It's all about getting the monitor to precisely the right height and focal length for easy viewing. And comfortable computing.

Of course, FYI (as the name implies) is for your information. It delivers the support that workers in a team of 2 or 10 require where sharing information is today's rule of thumb. FYI enables it.

Easier on-screen information sharing.

# Why Flat Panels?

The CRT was a wonderful workhorse in the long-ago era of the '80s and '90s. But that was then. Study after study shows the flat panel, with rare exception, is the replacement hardware of this millennium.

- **Energy Savings**

How about 60% savings in energy? The fact is, flat panel monitors use approximately 60% less energy than the average equivalent CRT.

- **Space Savings**

If time is money, then so is space. A flat panel monitor enables designers to maintain the same functional worksurface in 10% - 20% less space... even on a traditional 24" deep worksurface.

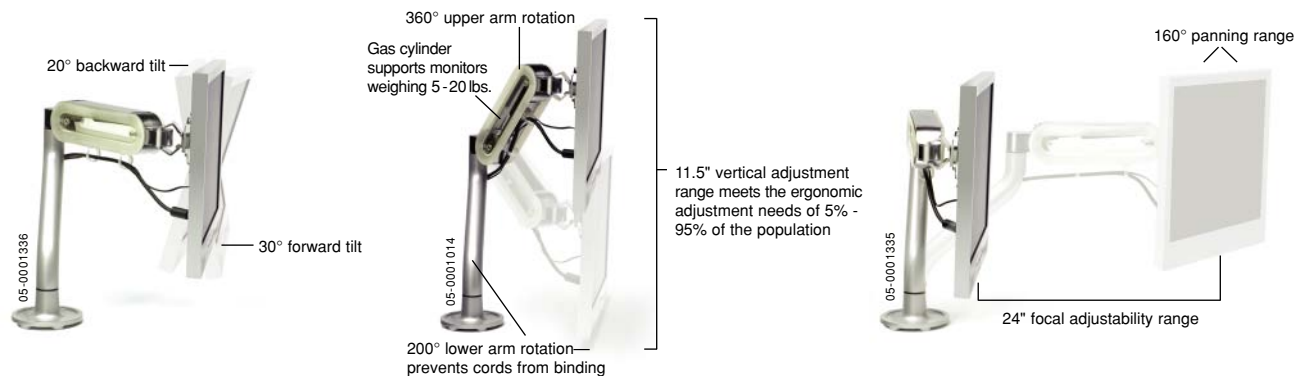

- **Healthier Work Styles**

The ergonomic adjustability of a flat panel monitor coupled with its superior quality image creates a healthier, more productive work environment for computer intensive workers.

- **Aesthetics**

The flat panel monitor helps to deliver a clutter-free worksurface and high-tech appearance. At the end of the day (and at the beginning, too) it helps workers feel better about their work and their workplace.

*Analysis of facility cost-savings associated with flat panel monitors from: Kingsland Scott Bauer Associates (KSBA) research study update – April, 2003.*

**A research driven difference.**

Details on-site research shows that most workers won't adjust a flat panel arm if the basic adjustments are troublesome. It's not the fault of the workforce. Workers know they should regularly adjust the arm and monitor. But knowing they should do it and actually doing it are two different things.

It's not a worker issue; it's a design issue. Most flat panel arms remain static because they're simply too darn difficult to maneuver. Unlike most other flat panel arms, FYI requires no mechanical adjustments for instant and effortless movement. Think of it as a device to enable the workforce to have a better — and more productive — day at work.

# Future-proofing.

FYI is designed to adapt to tomorrow's changing technology.

05-00010111

Built-in counter-balance tool so the user – not Facilities – can easily balance the monitor upon installation. No need for an allen wrench (which always seems to be missing!).

05-00010112

Field replaceable gas cylinder if the weight of a new monitor requires a change in the load-bearing capacity.

05-00010113

Quick-Connect™ for easy connection (or disconnection) of a flat panel monitor. Includes 75mm and 100mm VESA compliant monitor brackets. Also, includes a screw to provide monitor security.

05-0001323

Landscape/portrait configuration adapts to changing viewing needs.

Mounting options:

- Desk-clamp / Grommet mount
- Through mount
- Slatwall and SlatRail on architectural wall or freestanding stanchions
- Wall mount

05-0001334

Integrated cable and wire management system takes control of potential tangles.

Obligatory and important basic feature information.

- Supports monitors weighing 5 – 20 lbs.
- 24" focal adjustability range
- 11.5" vertical adjustment range
- 20° backward tilt
- 30° forward tilt
- 160° panning range
- 200° lower arm rotation
- 360° upper arm rotation
- Construction: Zinc diecast
- 24"W x 15"H
- 13.5 lbs. with Desk-clamp
- Warranty: 10 years on arm and mounting bracket, 5 years on gas cylinder

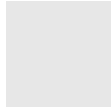

Style Number	Description
FPASINGLE	Flat Panel Arm single monitor
FPASPC	Desk-Clamp/Grommet mount bracket
FPATM	Through mount bracket
FPAWALL	Wall mount bracket
FPASWR	Slatwall and SlatRail bracket
