

Stella

The designers of the keyboard mechanism that's become the standard of the industry could have kicked back and left well enough alone.

But “well enough” wasn’t good enough.
So now the keyboard mechanism
that’s found under more worksurfaces
than most any other mechanism
is better than ever.

The better than ever Stella. Sustainable. Slim. Sturdy.

The newly re-designed Stella is C2C Silver certified. Recycled materials (very little virgin raw materials) were used in its construction. Then, years from now, it can be recycled to create other products of equal or greater value.

It's a closed material loop in which we pull very little raw material from the environment and send very little back to it.

That's what Cradle to Cradle is all about. So it's as kind to the earthplace as it is to the workplace.

Want to know more about the Cradle to Cradle story? Go here: <http://www.mbdc.com/>

09-0000322

Less material in its composition makes the new Stella slimmer.

09-0000326

Adjusts through its entire range – 3.5" above the track and 5" below the track – and directly adjacent to the worksurface to help keep work within a neutral reach zone.

Stella is now 3" shallower in the neck to maximize knee clearance.

And it's as solid as solid can be. We virtually eliminated flex using components that are aircraft quality. Yet we've retained all of **Stella's** patented features including its unmatched knob-free adjustability.

As always, of course, **Stella** rises above the worksurface. And above all those other mechanisms that don't. So it's the ideal mechanism to support an ever-changing and diverse workforce.

One-hand lever action adjustability.

09-0000325

Simply tilt to adjust through entire range.

Obligatory and important basic feature information.

Stella

Stella Standard

- Patented knob-free adjustability
- Proprietary cable-controlled mechanism
- Ideal for intensive computer user or multi-user workstation
- Works with all Details platforms
- Requires 20" worksurface depth clearance
- Ships with positive tilt locked out
- Tilt +/- 15°
- 36% recycled content
- 99% recyclable

Stella Extended

- Patented knob-free adjustability
- Proprietary cable-controlled mechanism
- Ideal for intensive computer user or multi-user workstation
- Works with all Details platforms
- Requires 24" worksurface depth clearance
- Ships with positive tilt locked out
- Tilt +/- 15°
- 34% recycled content
- 99% recyclable

Style Numbers/Descriptions

SS20

Stella Standard with 20" Track
Dimensions: W6½ x H6 x D16
Weight: 12 lbs.
Finish: Black

SE23

Stella Extended with 23" Track
Dimensions: W6½ x H6 x D20
Weight: 15 lbs.
Finish: Black

Please refer to the online electronic version of the Details SpecGuide for current pricing.

Mechanism Adjustability	Rear Swivel	Tilt	Range Above Track	Range Below Track	Track Length	Minimum Worksurface Depth
Stella Standard	360°	+/-15°	3.5"	5.0"	20.0"	20.0"
Stella Extended	360°	+/-15°	3.5"	5.0"	23.25"	24.0"
