WOOD SEATING

DESIGN INSPIRATION

Kami™ seating is designed to be an artistic yet economical seating solution for waiting areas, cafes and other spaces within healthcare environments. Built on a platform of quality and elegance, Kami seating is constructed of birch and crafted with the finest details in mind – like its mortise and tenon construction. Kami seating’s overall design features smooth straight lines with subtle curves and is sure to add the perfect finishing touch to the design of any healthcare space.

Available models include a single chair with or without arms and a two seat bench. All models can be connected chair to chair or with an inline ganging table.

FEATURES AND BENEFITS

ELEGANT Slightly curved wood back features birch veneer.

COMFORTABLE Fully upholstered seat cushion provides continuous comfort.

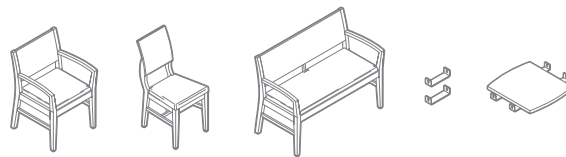

DURABLE Solid birch arm and leg assemblies create a sturdy frame with aesthetic appeal.

LASTING Perimeter guard is optional on the legs to provide long-term protection from scratches and dents.

CHOICES Additional options include an upholstered removable back pad on the arm chair and bench, moisture barrier on the seat and contrasting textiles on the seat and back pad.

STATEMENT OF LINE

Refer to Nurture specification guide for complete product details.
