

*A flexible approach that offers plenty of room for comfort, control...and inspiration.*

CASEGOODS

## DESIGN INSPIRATION

It became very clear very quickly that there is no cookie-cutter solution for every room in a hospital or clinic. Nurture recognizes this fact and provides a solution with Opus™ casegoods, which combine the convenience of traditional freestanding casegoods with the flexibility of modular furniture. All in a compact footprint. The array of components combines in a multitude of configurations including storage, seating, display, and even a unit that accepts a sink to support various activities in healthcare facilities. The design allows for a versatility that empowers architects and designers to create environments that promote healing.

## FEATURES AND BENEFITS

**MODULAR** Easy installation and redesign of customizable solutions allows the product to best work within the space.

**ACCESS** Sliding door moves easily—providing ready access without impeding traffic.

**COMMUNICATION** Whiteboard surfaces ensure easy communication between patients, caregivers and partners in care.

**OPTIONS** Shelving units offer visual access to personal belongings and gifts. Lighting elements give users greater control over their surroundings.

**STORAGE** Cabinet options provide ample storage for the patient and partner in care, ensuring clear walking paths.

**TECH SUPPORT** Technology routing behind the cabinets allows for easy wiring and access.

## MODULAR CONFIGURATIONS

Opus casegoods were designed to offer maximum flexibility within a given space as well as within a healthcare facility. Individual components can be combined in various configurations specific to their environment. This modularity makes it possible to unify many areas with a single, consistent aesthetic.
